EDUCATION

University of Florida, College of Engineering

Gainesville, FL

Bachelor of Science in Computer Science GPA: 3.55

May 2028

Minor: Digital Arts and Sciences

Relevant Courses: Software Engineering, Data Structures and Algorithms, Computer Organization, Discrete Structures, Advanced Programming Fundamentals

SKILLS

Languages: Python, C++, HTML/CSS, JavaScript, SQL

Frameworks: React, React Native, Node.js, Tailwind, Electron, Phaser, Flask, Unity

Developer Tools: Git, GitHub, PyCharm, CLion, VS Code, Figma

EXPERIENCE

UI/UX Internship

June 2024 - December 2024

Good Days

Frisco, TX

- Built and standardized a scalable UI design system for a high-traffic product, creating reusable components and interaction patterns that improved frontend consistency, maintainability, and user experience
- Validated user workflows through SQL-based testing and QA tools, identifying and resolving critical issues to improve product reliability
- Implemented accessibility standards and modern design principles to deliver an inclusive, intuitive, and polished user experience

Shadowing Experience

June 2023 - July 2023

Good Days

Frisco, TX

- Collaborated with senior professionals to analyze strategic decisions, operational processes, and team workflows
- Provided thoughtful recommendations during discussions that influenced team decisions and improvements

PROJECTS

Think Pink | JavaScript, HTML/CSS, React Native, MongoDB, Gemini API, Solana API

February 2026

- Engineered an AI-powered period tracking application with MongoDB, Gemini API, and Solana API, integrating predictive features, health insights, quizzes, and donation resource mapping
- Led frontend development and UI/UX design in React Native, building a responsive and accessible interface designed around user privacy and usability
- Part of a winning team in the WiNGhacks Hackathon for this application

Forkcast | JavaScript, HTML/CSS, Tailwind, Firebase, Gemini API

January 2026

- Developed an AI-powered recipe generation app that suggests meals based on user input and detected fridge ingredients in an agile, cross-functional team setting
- Owned UI/UX implementation, integrating AI-driven features into an intuitive and responsive frontend experience

Ultimate Movie Recommender | C++, Python, HTML/CSS, Flask

December 2025

- Built a full-stack web application leveraging BFS and DFS traversal algorithms to explore graph-structured movie data and generate recommendations
- Implemented a Flask backend for algorithmic processing and designed a responsive frontend from scratch to present traversal results

EXTRACURRICULAR

Public Relations Officer | UF Society of PC Building

June 2025 - Present

- Produced and managed all digital content including promotional videos, PC build showcases, and event graphics to increase club visibility across social media and campus platforms.
- Initiated outreach to 10+ technology companies, securing collaboration discussions and sponsorship interest.

Internal Mentee | UF Women in Computer Science and Engineering

August 2024 - December 2025

- Actively learned skills to collaborate more productively, strengthening communication skills and work efficiency
- Participated in technical and professional development workshops, enhancing software engineering skills

AWARDS

Most Ambitious Award | UF Society of PC Building

April 2025

- Given yearly to a BLUE Leader that displayed immense achievement and growth
